Mihir Jasani

Toronto, ON | (226) 883-1928 | mihirjasani369@gmail.com | linkedin.com/mihir-jasani

Summary

Data analyst with experience using SQL and advanced Excel to organize, validate, reconcile, and analyze operational and financial reporting data. Skilled in developing database queries, maintaining data quality, and preparing reports for management. Experienced in collaborating with business stakeholders to clarify data requirements, document reporting calculations, and communicate meaningful insights.

Key Skills

- **Database Querying & Data Preparation:** SQL, MySQL, Joins, Aggregations, Filtering, Data Extraction, Data Consolidation.
- **Advanced Excel:** Pivot Tables, XLOOKUP, Power Query, Power Pivot, Data Manipulation, Charts.
- **Data Quality & Integrity:** Data Cleansing, Validation, Reconciliation, Reporting Accuracy, Calculation Documentation.
- **Reporting & Communication:** Power BI, DAX, Management Reporting, Ad Hoc Reporting, Microsoft Word, PowerPoint.
- **Business Collaboration:** Data Requirements Gathering, Stakeholder Communication, Analytical Problem-Solving, Process Improvement.
- **Application Development & Cloud:** Python, FastAPI, Streamlit, AWS EC2, Docker, GitHub Actions, Git.
- **Additional Tools:** Microsoft Word, PowerPoint, Outlook, Access.

Education

Business Insights and Analytics (Graduate Certificate) - Humber College, Toronto, ON — Jan 2023 - Aug 2025

Bachelor of Technology in Information Technology - P.P. Savani University, Gujarat, India — Jul 2017 - May 2021

Work Experience & Internship

Data Analyst - Elevara Digital, Toronto, ON — **Oct 2025 - PRESENT**

- Develop SQL queries using joins, aggregations, and filtering to retrieve and consolidate business data for reporting and analysis and generate data exports.
- Clean, validate, and reconcile reporting datasets to improve data completeness, accuracy, and consistency.
- Collaborate with business stakeholders to understand data requirements, define KPI calculations, and recommend reporting solutions.
- Develop and maintain Power BI dashboards and communicate operational trends and findings to support management decisions.

Data Analyst Intern - Impact Zero, Toronto, ON — **Apr 2025 - Sep 2025**

- Cleaned and consolidated HubSpot CRM data and developed a Power BI dashboard covering over $400K in pipeline revenue, reducing sales deal tracking time by 50%.
- Created custom reporting metrics and communicated sales pipeline findings to leadership to support business decisions.
- Built a Python and Streamlit application to summarize more than 500 meeting notes and extract action items, improving executive task follow-up by 35%.

Peer Tutor - Humber College, Toronto, ON — **Jun 2023 - Aug 2025**

- Delivered workshops and personalized support in Excel, Power BI, and statistics, adapting explanations to learners with different levels of technical understanding.
- Explained data modeling, regression analysis, and hypothesis testing in accessible language, helping students apply analytical concepts to coursework.

Jr Reporting Analyst - Scalezix Technologies, Ahmedabad, India — **Dec 2021 - Oct 2022**

- Developed Power BI data models and dashboards to analyze procurement spend across purchasing channels, improving leadership visibility and identifying potential cost savings of 30%.
- Used Excel Power Query, Pivot Tables, and XLOOKUP to prepare and analyze procurement data, reducing weekly reporting effort by 22 hours.
- Managed recurring weekly reporting deliverables, prioritized deadlines, and presented procurement spend trends and findings to non-technical stakeholders.

Projects

Procurement Spend & Purchase Order Analysis — **Jul 2026**

- Developed an interactive Power BI dashboard using data covering 250 purchase orders, 508 invoice records, and 12 cost centres to analyze procurement spend across business units and divisions.
- Prepared data using Power Query, configured a source-data parameter, and built a star schema and date table to support consistent DAX calculations and time-based analysis.
- Combined KPI summaries, supplier comparisons, organizational filters, and purchase order drillthrough to help users explore spend, remaining balances, and potential breach indicators.
- Documented KPI definitions and DAX calculation logic for purchase order value, invoice spend, remaining balances, and utilization to support consistent reporting and interpretation.

Business Insights 360 – Brick & Mortar and Ecommce Feb 2026

- Developed a multi-functional Power BI dashboard that drove a 10% increase in revenue and a 20% reduction in data-related expenses by providing actionable insights into global sales trends for AtliQ Hardware.
- Resolved data fragmentation issues from multiple sources (CSV files and MySQL database), improving data accessibility and decision making which enhanced alignment of sales strategies across business units.
- Utilized Power BI for data integration, Report creation, and visualization, employing ETL operations to clean, filter, sort, and enrich data for improved analysis. Designed a snowflake schema-based data model to simplify relationships and enhance performance.
- Used DAX in Power BI to perform complex calculations like net sales, year-over-year comparisons and other insights. Utilized various functions, including aggregation, date & time, logical, and time intelligence. (date table for consistency & trending insights).
- Built an executive dashboard with effective visualizations, including KPI cards, bar charts, and line charts, to present data insights clearly and support strategic decision-making.

Volunteering

Career Mentor & Event Coordinator – RiseUp, Community for Youth

- Mentored students in data careers, hosted job readiness events, and led workshops on analytics tools.
- Coordinated seminars with 100+ attendees and managed logistics, communications, and speaker coordination.
